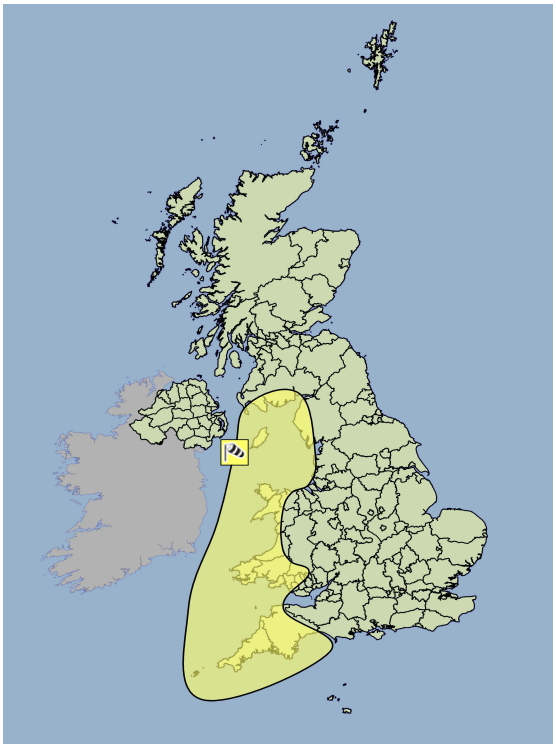
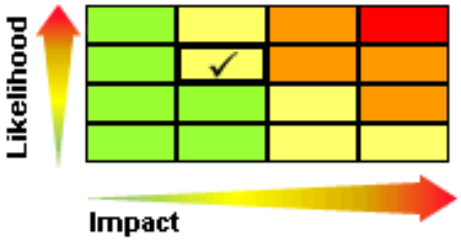
National Severe Weather Warning Service





Chief Forecasters Assessment
As a deep area of low pressure passes close to the northwest of the UK, wind speeds across exposed parts of Wales, northwest and southwest England and south west Scotland are expected to increase. Gusts of 50-60 mph are likely, with some exposed areas seeing gusts approaching 70 mph.

This warning will be kept under review and updated as necessary.

The Met Office have issued a **Yellow Alert** of **Wind**

Valid from **06:00 on Wed, 30th Dec 2015** until **15:00 on Wed, 30th Dec 2015**

A deep area of low pressure is expected to track close to the northwest of Ireland, then Scotland late Tuesday and through Wednesday. Some very strong winds are expected to develop on Wednesday through the Irish Sea and around western and southern coasts of England and Wales along with coastal south west Scotland.

Some disruption to transport is possible
